Retours :

IN ALL CASES AND IN ALL NEW DEVELOPMENTS, YOU HAVE TO CHECK IF EACH FILE (file, picture, thumb, etc.) IS EXTERNAL OR INTERNAL : IF IT BEGINS WITH <http://> | <https://> OR NOT.

You can use a regex like : `#https?:\:\\/#\Uis`

IF IT BEGINS WITH THIS, FILE HAVE TO BE LOADED WITH THIS URL, IF NOT, FILE HAVE TO BE LOADED WITH THE "media_url" LIKE BEFORE.

- Internet Radio list : <http://sdk.eg-ad.fr/api-docs/#webradio>

En revanche il n'y a qu'un seul visuel par webradio disponible, le même affiché sur le site (en l'occurrence les logos ronds jaunes) docn je vois pas comment il vont réussir à coller au graphisme...
